

Press release

SCHNEEBERGER Enhances Collaboration with Trading Partners through the Introduction of a Global Partner Program

Distinguishing ourselves through customer proximity, application consulting, and consistently going the extra mile has always been our hallmark. In line with our commitment to optimizing this approach highly valued by our customers, we are proud to announce the launch of the SCHNEEBERGER Partner Program.

The primary objective is to further fortify our international network of representatives and competencies, thereby extending the renowned SCHNEEBERGER standard of support and advice globally. A key element of our strategy is to enhance support for our trading partners in presenting and advising customers on our high-performance, high-quality, and comprehensive SCHNEEBERGER portfolio, irrespective of the application and geographical location.

Tobias Daniel, CSO, emphasizes, "Whether you engage with us directly or through a partner, our customers will consistently receive the same high-quality support and advice."

Walter Lenk, Global Partner Manager & Market Development, expresses his enthusiasm, stating, "I am delighted to establish a high global standard for our customers with the new partner program and take pride in this significant step forward."
